Hi James,

Sarah Clem forwarded me your contact information. I am the monitoring coordinator for Arkansas in our regional office. Accompanied by ADEQ, I would like to come out and sample Coffee Creek, Mossy Lake, and parts of the Ouachita River in late February. The sampling sites would be very similar to a previous study by EPA in 2005 that was performed by Parsons (EPA contractor). The study was entitled " Use Attainability Analysis and Water Quality Assessment of Coffee Creek, Mossy Lake, and the Ouachita River (attached with this email). If this visit is possible, please let me know if there is anything I can do to help facilitate. Many thanks in advance for your help and consideration!
